## Office Action Summary

Application No.

09/465,236

Applicant(s)

HARROW ET AL.

Examiner

Ricardo M. Pizarro

Art Unit

2661

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on 02 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 2-7,9-14 and 32-37 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 9 and 10 is/are allowed.
- 6) ☒ Claim(s) 2-7,11-14 and 32-37 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 2-7 , 11-14, 32-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Su. U.S. patent No. 6,463,414 ( Su et al) discloses a conference bridge processing of speech in a packet network environment including an apparatus for using a plurality of processors to support a media conference comprising : mixing processor ( mixers elements in Fig. 2) operable to mix input media information associated with two or more first participants ( participants 1, 2, .. in Fig. 2) to generate output media information for communication to a second participant ( participant 3 in Fig. 2), a first media transformation processor coupled to the mixing processor ( i.e. encoder 232 in Fig.2 is a media processor is coupled to the mixing processor 3 ) , said processor operable to receive the output media information from the mixing processor ( encoder

Art Unit: 2661

element receive output information from mixing processor in fig.2) to encode the output media information to generate an output data stream and to communicate the output data stream to the second participant's end-user device , a second media transformation processor coupled to the mixing processor, as in claim 2 and 3; said second processor operable (i.e. decoder 230 is a media processor coupled to the mixing processor in fig. 2) to receive an input data stream from a first participant's end-user device (participant 1) to decode the input data stream ( input 210 in Fig. 2) to generate input media information associated with the first participant and to communicate the input media information associated with the first participant (participant 1 in Fig. 2) and to communicate the input media information associated with the first participant to the mixing processor, as in claim 2; said second processor operable (i.e. decoder 230 is a media processor coupled to the mixing processor in fig. 2) to receive an input data stream from a first participant's end-user device (participant 1) to decode the input data stream ( input 210 in Fig. 2)to generate input media information associated with the first participant and to communicate the input media information associated with the second participant (participant 2 in Fig. 2) and to communicate the input media information associated with the second participant to the mixing processor, as in claim 3; wherein said mixing processor is operable to receive an input data stream from a first participant's end user device and to decode the input data stream to generate input media information associated with said first participant, as in claim 4.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 32-34, 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Su.

A plurality of end user devices ( end user device 1-,2,3,..n in Fig. 2) coupled to a data network (i.e. coupled to packet network 102) and operable to generate media information to encode input media information to generate input data streams ( devices have encode/ decode means at the bridge) , a conferencing device coupled to the data network( conference bridge 200 in Fig. 2), the conferencing device comprising processors operable to decode input data stream to generate the input media information ( decoder means at device 200 in Fig. 2), to mix the input media information to generate output data information ( mixers elements in Fig. 2) and to encode the output data to generate output streams, wherein the end-user devices are further operable to receive the output data stream and to decode the output streams to generate output media information ( end-user devices inherently include encode/decode means)and wherein the conferencing device further comprises a mixing processor operable to mix the input information to generate the output media and one or mote transformation processor ( encoder means at conference bridge 200 in Fig. 2) operable to encode the output media information to generate output data streams, as in claims 32-34; wherein the conference is a voice conference ( col 2 lines 12-16), as in claims 7, 37.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5, 6, 35-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Su in view of Leondires.

Su did not specifically disclose said processors being separate as in claim 35, being DSP as in claim 36.

US patent No. 5,841,763( Leondires et al) discloses a conferencing device with separate processors ( separate processor in Fig. 3) , as in claim 5, 35, said processors are DSP ( col 14 lines 51-60), as in claims 6, 36.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to provide the DSP means as disclosed in Leondires to the Su system with the motivation of obtaining a conferencing system equipped to service conferees that employ ITU standards wherein the number processing resources can be reduced

***Allowable Subject Matter***

7. Claims 9-10 are allowed.

Art Unit: 2661

***Conclusion***

**8. Any response to this action should be mailed to:**

Commissioner of Patents and Trademarks

Washington, D.C. 20231

**or faxed to:**

(703) 872-9314

(for formal communications intended for entry, for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA., Sixth Floor (Receptionist).

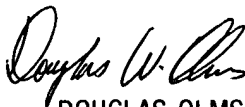

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Ricardo Pizarro** whose telephone number is (703) 305-1121. The examiner can normally be reached on Monday-Friday from 9:00 AM to 5:30 PM. The fax number for this Group is (703) 872-9314.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Douglas Olms**, can be reached on (703) 305-4703.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4700.

2/10/2004
